9. NEW BUSINESS

9.a [Request from Member of the Public: Converting Pools to Salt Water Chlorination System](#)

A community member has requested that the pools at the Aquatic Center be converted to a salt-water chlorine system to replace the existing calcium hypochlorite (cal-hypo) sanitization system because of skin sensitivity and health concerns. Staff have done research into salt chlorine delivery systems and have determined that any water quality improvements and chemical cost savings would be outweighed by the conversion cost, over \$130,000, as well as ongoing replacement costs and concerns that there could be significant corrosion issues caused by the use of salt as a chlorinating agent.
